DETAILED ACTION

Election/Restrictions

1. Claims 5-6, 9, 14, and 16-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected Groups, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 05/12/04.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-4, 7-8, 10-13, and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1 and 10-11, the claimed limitation "a tone output controller for causing the tone output from a call tone output unit, which outputs a call tone upon a call arrival, when a call arrives in the folded state of the hinge and from a receiver, which outputs a reception tone, when the hinge is unfolded from the folded state" render the claims indefinite.

First of all, the claimed subject matter "a tone output controller for causing the tone output from a call tone output unit" should be changed to -- a tone output controller for causing a tone output from a call tone output unit--.

Second, is the tone output unit -- outputs a call tone upon a call arrives when the hinge is folded and from a receiver or just outputs a call tone upon a call arrives when the hinge is folded?

Third, is the receiver -- outputs a reception tone? If this is the case, then how can a receiver outputs a tone?

Fourth, is the receiver - outputs a reception tone upon a call arrives when the hinge is unfolded or is the tone output unit -- outputs a call tone upon a call arrives when the hinge is folded and when the hinge unfolded the receiver outputs a reception tone?

Appropriate corrections are required.

As per claims 2-3, as stated in claim 1, the claimed limitation "the tone output controller causing tone output only from the call tone output unit when a call arrives in the unfolded state of the hinge" render the claims indefinite. Is this step follow or contingent from previous step(s) or this is the first or initial step? Appropriate correction is required.

As per claim 4, as stated in claims 1-3, the claimed limitation "causing tone output from the receiver when the hinge is folded from the unfolded state" renders the claim indefinite. Is the tone output from the receiver when the hinged is unfolded?

Appropriate correction is required.
